WSP406  
UK-Z-TY

Zigbee Smart Socket (UK)

## Description

The WSP406 Zigbee Smart Socket allows you to control, schedule and monitor your home electrical appliances via your mobile phone or manually power on / off.

## Main Features

- ZigBee 3.0 compliant
- Check and control the status of the smart switch by mobile APP.
- Physical button to switch on/off manually
- Power-off Memory: Automatically restores previous state after power recovery.
- Enables scheduling for automatic switching
- Support Amazon Alexa and Google Assistant etc.
- Extends the range and strengthens ZigBee network communication
- Available in white, black, and gray.
- High quality crystal tempered glass panel design, never fade.

## Main Specifications

| Connectivity            |                                                                                                                                                        |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| ZigBee                  | <ul style="list-style-type: none"><li>• 2.4GHz IEEE 802.15.4</li></ul>                                                                                 |
| ZigBee Profile          | <ul style="list-style-type: none"><li>• ZigBee 3.0</li></ul>                                                                                           |
| RF Characteristics      | <ul style="list-style-type: none"><li>• Operating frequency: 2.4GHz</li><li>• Internal PCB Antenna</li><li>• Range outdoor: 100m (Open area)</li></ul> |
| Physical Specifications |                                                                                                                                                        |
| Operating Voltage       | <ul style="list-style-type: none"><li>• 100~240 Vac 50/60 Hz</li></ul>                                                                                 |
| Wireless consumption    | <ul style="list-style-type: none"><li>• &lt; 0.2 W</li></ul>                                                                                           |
| Max Current             | <ul style="list-style-type: none"><li>• 13A</li></ul>                                                                                                  |
| Operating environment   | <ul style="list-style-type: none"><li>• Indoor</li><li>• Temperature: -20 °C~+70 °C</li><li>• Humidity: ≤ 95% non-condensing</li></ul>                 |
| Dimension               | <ul style="list-style-type: none"><li>• 86 (L) x 86(W) x 45 (H) mm</li></ul>                                                                           |
| Weight                  | <ul style="list-style-type: none"><li>• 152.3g</li></ul>                                                                                               |
